

## DATA SHEET

# Neutralisant / Neutralising Agent

### Description

Harmony Neutralising Agent is a ready-to-use aqueous solution which is specially formulated for application after the treatment of concrete with Harmony Acid colorant. This solution allows the neutralisation of any acid residues.

### Characteristics

Type: Neutralizer

Colour: green

Packaging: 1 l, 5 l, 20 l

Dosage: 1 litre = 10 m<sup>2</sup> undiluted and depending on the porosity of the surface.

Storage: 6 months in unopened original packaging, stored in a dry and frost-free location.

Guarantee: Manufacturer's liability

### Tools & Cleaning

Sprayer, gloves, goggles, long-handled brush, tarpaulin.

Clean tools in water after use.

### Application

Apply Harmony neutralising agent using a sprayer.

1. Spray Harmony neutralising agent over the surface in a ratio of 1 litre per 10 m<sup>2</sup>, using a manual sprayer or an electric spray gun.
2. Leave the product to work for 5 minutes. Brush, then rinse. No acid colorant residues must be left.
3. Leave the product to work for 5 minutes. Brush, then rinse. No acid colorant residues must be left.

### Protection

For information see the technical data sheet for acid stain, lacquers with wet-effect and SL Permapro.

The information included in this data sheet is derived from our knowledge and experience of products. In the light of the wide range of potential uses and forms of application, together with constraints associated with conditions of application or subjective conditions, the data contained herein are provided for information only, and have no legal value. Before any application, it should be checked that the present data sheet has not been superseded by a subsequent version. Version of 16/10/2018. [www.harmony-beton.com](http://www.harmony-beton.com)
