SMOOTH CONCRETE (continued)

Harmony Béton smooth concrete is an easy-to-use and decorative self-levelling smoothing compound. Its mechanical properties, which have been tested by the CSTB scientific & technical centre for building construction (CSTB report n° R2EM-SIST-12-26039058), ensure its high resistance to traffic and indentations.

An outstanding renovation product, **Harmony Béton** can be easily applied to new or old base surfaces, concrete slabs or tiling, to a minimum thickness of 4 mm. With its mineral appearance and its multiple colour shades, this product blends perfectly with your décor, from the latest designs to the most traditional, and will become the main decorative architectural feature in your interior design. Combining strength, covering power and colouring, self-levelling concrete is the ideal choice for your floor renovation works.

BÉTON CIRÉ

CONTEMPORARY FEEL
TEXTURE
FLOATED EFFECT

Harmony Béton ciré is a mortar designed for application to any horizontal or vertical surface. Its exceptional mechanical properties make it suitable for the coverage of any new or old base surface (tiling, timber, metal, plaster, etc.) in a fine 2 – 3 mm layer.

Its material shades and colours will vary, depending upon the type of application completed. A fine, silky, soft or structured finish can be achieved.

Like any contemporary design material, this product lends a natural and distinctive appearance to your interiors.

Give free rein to your decorative inclinations and bring a touch of style to all your rooms (kitchen, lounge, stairway, shower rooms or furnishings), by varying colours and textural effects.

EMBOSSSED CONCRETE (continued)

Harmony Béton embossed concrete is a floor covering system which allows the imitation of the appearance of a variety of natural materials, including stone, timber or brick. An enormous range of coloured quartzes, numerous patterns and a wide variety of moulds provide a high degree of freedom in design and application. Harmony Béton embossed concrete delivers a cost-effective and durable decorative concrete finish which can be easily and permanently integrated into the space required, however constricted.

ACID STAIN

UNIQUE ORIGINAL
MARBLED STRIKING

Harmony Acid stain is a liquid acid colorant which allows the colouring of any concrete base surface by chemical reaction. By the penetration and permanent colouring of concrete, this system delivers an exceptional, unique and personal finish. Depending upon the application selected, Harmony Acid Stain will give your floors a marbled appearance, with deep and varied colour shades.

SPRAYED CONCRETE

MATERIAL
WAXED CONCRETE APPEARANCE

MINERAL EFFECT

Harmony Sprayed Concrete is a mortar which has been specially designed for exterior application to an existing surface using a spray gun, or for manual application using a smoother.

This innovative and high-performance decorative concrete refreshes and enhances your patios, swimming pool surrounds, walkways and paths, producing a waxed concrete finish by the reproduction of natural materials such as cobbles, stone, brick, etc., which can be achieved by stencilling.

With its fine grain, mineral appearance and soft colours, this product can provide a key aesthetic element in your exterior decoration.

POROUS CONCRETE

UNIQUE

INNOVATIVE

ECO-FRIENDLY

Harmony Béton porous concrete is a polyurethane resin combined with marble to deliver a high degree of permeability. An eco-friendly alternative to bitumen or concrete, this product allows water to drain into the ground. Anti-slipping, frost-resistant and easy to maintain, Harmony Béton porous concrete is a decorative option for your walkways and swimming pool surrounds. Let your soils breathe and create a floor finish using different marble shades.

DEACTIVATED CONCRETE

Harmony Béton deactivation agent is a surface deactivator which highlights the granulates contained in concrete by eliminating the surface layer of concrete.

By the layout of materials (stones, slabs or bricks) and the use of granulates of different colours and sizes, it is possible to create aesthetic and harmonious surfaces which will enhance your exterior developments.

Providing a durable, hard-wearing and easily-maintained surface, Harmony Béton deactivation agent is ideal for the production of a gravelly, non-slip and visually appealing concrete finish at minimum cost.

Detail of deactivated concrete finish

Harmony

Harmony Béton is a company which is exclusively dedicated to the manufacture and marketing of decorative concretes for interior and exterior use, and can offer one of the widest ranges of decorative concretes in France.

Born from the combination of a two-fold expertise, one from the field (Patrick Leborgne) and one from industry (Placeo), Harmony Béton has continued to expand, both in France and internationally.

Béton: about us

22

Our capacity for the adaptation of both production and packaging allows us to respond to any type of demand, whether for individuals, craftsmen, wholesalers, Harmony distributors or private label distributors.

Packaging ranges from a single 250 ml bottle to a 1,000 l IBC, and from a 1 kg tub to a 1,200 kg pallet.

Our commitment to the continuous improvement of our products, the in-house quality control delivered by our production quality management system, tests conducted by the CSTB and our position as market leader ensure that we are always ahead of the field.

By choosing Harmony Béton, you are choosing an excellent quality/price ratio, a vast range of products and, naturally, a team which is fully-focused on customer satisfaction.
